

Loading Dock Security and Safety Taken to a New level

BeLock Controller provides a signal when the door is locked. Now the most durable sectional door lock available can control all of the functions at your dock.

Base System includes:

- Enhanced BeLock with an integrated micro switch
- 2 meter quick disconnect cable
- Control box with face mounted LED indicator light
- 12VAC control voltage

Benefits:

- More secure than traditional slide locks, as the BeLock Controller traps the roller.
- Nearly indestructible lock with superior holding force
- See from a distance if your door is locked

BeLock Controller Plus is the above customized to your needs:

- Optional 3 circuit relay
- Optional photo eye
- Optional wireless capability
- Optional remote monitoring

Allows for an interlock with:

- Dock Leveler
- Door Operator/Opener
- Dock Light
- Traffic Safety Lights
- Building Security System
- Compactor door
- HVAC Systems and more

BeLock Controller Plus will be designed specifically for your application and for your desired output. The BeLock Controller Plus has the ability to know if your door is closed and locked.

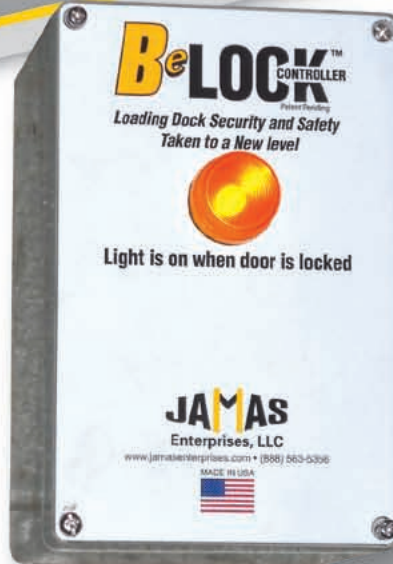

Call us today or visit our website to learn more about how we can:

- Save Energy
- Increase Safety
- Increase Security
- Reduce labor cost
- Reduce shrinkage
- Reduce maintenance cost
- Accumulate door usage data
