

## The Dock Light in a Bollard

Protected inside the bollard, the BeLight is the perfect solution to avoid constantly replacing dock light fixtures and bulbs.

### The BeLight Dock Light Solution:

- Sleek, Monolithic Design
- Patented dock light which is nearly indestructible.
- The bollard protects the dock light, as well as the door track.
- Standard Par (Medium E26) bulb base, which is LED compatible.
- Greatly reduces maintenance costs related to damaged dock lights.
- Eliminates safety issues regarding hanging dock lights.

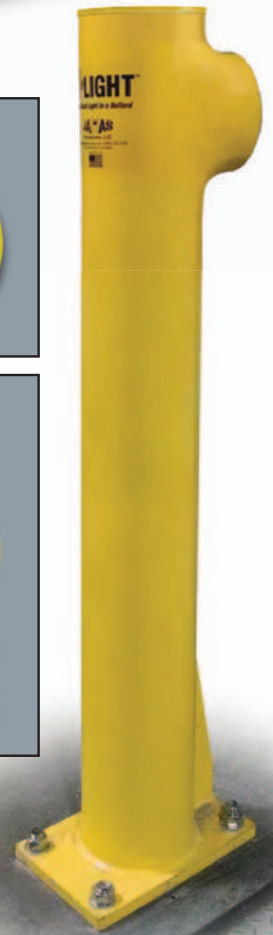

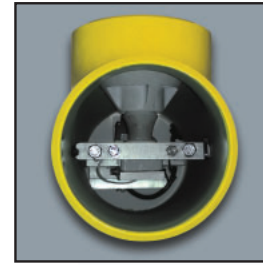

### The ultimate truck trailer illuminating light:

- Utilizing a photo eye in the capsule, the light is only on when the door is open
- Also, available with a manual switch
- Remains fixed at your optimized setting (Only requires positioning once, at installation)
- Eliminates the swing arm from collapsing the door track
- Removes the obstruction in the door opening that conventional dock lights create
- Adapts to any dock condition
- Available for left hand and right hand applications
- Installation applications include: cored in, base plate, or offset on an existing bollard
